Department of Computer Science & Engineering

Two days' Workshop on

IOT using Raspberry Pi

11th and 12th March 2k20

Computer Science & Engineering department has conducted a two days Lead College sponsored workshop on “**IoT using Raspberry Pi**” on 11th March & 12th March 2020. This workshop was very much helpful for students to acquire the detailed technical knowledge regarding Python, Raspberry Pi & Sensors. The workshop has been conducted by Mr. Tejas Shah (Enverto). Inauguration of this workshop was carried out in presence of Incharge HOD of Computer Science & Engineering Dr. A. M. Chougule. Photos of the workshop are attached herewith.

Total 45 candidates actively participated in this workshop. Mr. Tejas Shah has delivered nice sessions on Internet of Things. He has covered following points in 2 days sessions.

Day 1

Introduction to python

Python statements Statement

Data types

Loop

Conditional statements

Function

Introduction to Raspberry pi

Installing OS in Raspberry Pi

Introduction Raspbian

Raspbian Linux commands

Sensor information

Day 2

Working with

- Temperature and Humidity Sensor
- 5v Relay
- Metal Touch Sensor
- Flame Sensor
- Ultrasonic Sensor
- Soil Module
- Water Level Module
- Microphone sound sensor module
- LED

Introduction to thing speak API
